

Learner Worksheet

Course: Mastering Semiconductor Key Modules for Enhanced CMOS Process Integration and Device Performance
Course code: TGS-2024051248
Package: v9.0 | 20 August 2026
Activity: 1 - Build a CMOS Process Module Map
Alignment: LO1 | K1, A1, A2
Duration: 45 minutes

Scenario Restatement

In your own words, describe the process-integration decision that this activity requires.

Response:

Process and Evidence Table

Stage / issue	Intended function	Input or risk	Measurement / evidence	Decision or follow-up
1				
2				
3				
4				
5				

Analysis Questions

Question 1

Which module has the greatest ability to propagate a hidden defect downstream, and why?

Response:

Question 2

What evidence would allow the integration owner to release the lot to the next module?

Response:

Decision

Select one: Release / Conditional Release / Hold / Scrap / Proceed / Defer

Evidence-based rationale:

Next action, owner and due date:
