

Learner Worksheet

Course: Mastering Semiconductor Key Modules for Enhanced CMOS Process Integration and Device Performance
Course code: TGS-2024051248
Package: v9.0 | 20 August 2026
Activity: 7 - Respond to an SPC CD Excursion
Alignment: LO2 | K2, A3, A4, A5
Duration: 90 minutes

Scenario Restatement

In your own words, describe the process-integration decision that this activity requires.

Response:

Process and Evidence Table

Stage / issue	Intended function	Input or risk	Measurement / evidence	Decision or follow-up
1				
2				
3				
4				
5				

Analysis Questions

Question 1

Why must the team investigate a non-random run even when all points remain inside control limits?

Response:

Question 2

Which chart is appropriate for CD measurements, and which is appropriate for defect proportions?

Response:

Decision

Select one: Release / Conditional Release / Hold / Scrap / Proceed / Defer

Evidence-based rationale:

Next action, owner and due date:
